

AGNES 8497

The gloves are designed primarily for handling animals and catching them. They are suitable for municipal police, animal catching services, veterinarians and zoos. Their material composition and practical cut ensures great resistance to biting, tearing and shredding, while maintaining maximum possible flexibility and sensitivity when dealing with animals. The gloves are equipped with functional reinforcements in the places most at risk.

DESCRIPTION

Cuff type: Short

Color variant:  Yellow

UPPER MATERIAL:

- Palm - Back: Elk leather with hydrophobic treatment
- Cuff: Cordura®

REINFORCEMENT:

- Internal reinforcement: PU foam - back of the glove, back of the thumb, cuff
- Leather reinforcement: The thumb and index finger

LINING:

- Palm - Back: Aramid knit with increased weight
- Wristband: 100% Kevlar®

CUFF:

- The length of the cuff is 15 cm.

KEY PROPERTIES:

- The natural leather makes the glove highly sensitive and flexible.
- However, it retains breathability and typically high strength.
- Metal ring for hanging the gloves on a snap hook.

STANDARDS:

- The catching gloves achieve high levels of protection against mechanical risks and are tested according to EN 388:2003.

EN388:2003

SIZES ASSORTMENT:

- 7 / 8 / 9 / 10 / 11 / 12

AGNES 8497

The catching gloves achieve high levels of protection against mechanical risks and are tested according to EN 388:2003

Size	7 (S)	8 (M)	9 (L)	10 (XL)	11 (2XL)	12 (3XL)

CARE & MAINTENANCE

Leather gloves are machine washable at 40°

PROCEDURE:

- Remove coarse dirt after each use.
- Before washing, fasten the Velcro fasteners and remove the snaps.
- Use a liquid detergent. Wash on a short programme.

TO MAKE THE GLOVE FIT BETTER:

- Shape the glove several times after washing and during drying.
- Do not dry in direct sunlight or heat sources, do not use a tumble dryer.
- Store the gloves in a dry environment.

WE RECOMMEND TO USE:

Washing Gel Holík

Washing gel is natural based for leather and textile gloves with high washing efficiency. It reduces bacteria, does not pollute the environment and is fully biodegradable.

Holík Emulsion

The Holík emulsion protects against water, oil, dirt and revives the colour. Adding fat to the leather prevents the leather from hardening during drying. The emulsion is intended as a nourishment for leather products. For easy use, you will also find a sponge in the package for easy application.

Holík impregnation spray

Highly effective impregnating spray for leather and textiles. The fluorocarbon based impregnation adds water repellency, oil repellency and anti-chafing to the face of the glove while leaving the product breathable. The impregnation is applied to the dry product in a thin layer and allowed to dry for a minimum of 12 hours.
