

AGNES 8497

Gloves designed primarily for handling small animals and catching them. Their material composition and practical cut ensures great resistance to biting and tearing, while maintaining maximum possible flexibility and sensitivity when dealing with animals. The gloves are equipped with functional reinforcements in the places most at risk.

AGNES

PRODUCT DESCRIPTION

Colour:  Yellow
AGNES 8497

UPPER MATERIAL:

- Palm – Back: Elk leather with hydrophobic treatment.
- Cuff: Cordura®.

REINFORCEMENT:

- Internal reinforcement: PU foam - back of the glove, back of the thumb, cuff.
- Leather reinforcement: The thumb and index finger.

LINING:

- Palm – Back: Aramid knit with increased weight.
- Cuff: 100% Kevlar®.

CUFF:

- The length of the cuff is 15 cm.

OTHER INFORMATION:

- Breathability, high sensitivity, flexibility and high strength.
- The natural leather makes the glove highly sensitive and flexible.
- Metal ring for hanging the gloves on a snap hook.

STANDARDS:

- This model of catching gloves achieve high levels of protection against mechanical hazards and are tested according to EN 388:2003.

AGNES 8497

Leather reinforcements on index finger and thumb

Inner reinforcement is made of PU foam

Cordura cuff is 15 centimetres long

size	7 (S)	8 (M)	9 (L)	10 (XL)	11 (2XL)	12 (3XL)

CARE & MAINTENANCE:

Choose a more ecological short washing program at 40 °C.

PROCEDURE: Remove coarse dirt after each use. Before washing, fasten the Velcro fasteners and remove the snaps. Use a liquid detergent. Wash on a short programme.

TO MAKE THE GLOVE FIT BETTER: Shape the glove several times after washing and during drying. Do not dry in direct sunlight or heat sources, do not use a tumble dryer. Store the gloves in a dry environment.

RECOMMENDED USE:

Holík Washing Gel

The washing gel is natural based for leather and textile gloves with high washing efficiency. It reduces bacteria, does not pollute the environment and is fully biodegradable (Eco-Friendly).

Holík Emulsion

The Holík emulsion protects against water, oil, dirt and revives the colour. Adding fat to the leather prevents the leather from hardening during drying. The emulsion is intended as a nourishment for leather products. For easy use, you will also find a sponge in the package for easy application.

Impregnation spray Holík

A highly effective impregnating spray for leather and textiles that protects against moisture, water, oil and dirt while maintaining the breathability of the material. Apply the impregnation in a thin layer on dry product and allow to dry for at least 12 hours.
