

FORESTA 8270

Forest fire gloves are exceptional for their high breathability, sensitivity and protective properties.

UPPER MATERIAL:

- Back: effiSHELL, material composition developed by Holik (more info below).
- Palm: Washable, waterproof and thermo-stable goatskin with minimal shrinkage.

LINING:

- Palm: Para-aramid/PES/Fibreglass lining providing protection to mechanical risks.
-

REINFORCEMENT:

- Back: Goatskin in the joint area.
- Fingertips: Goatskin.

MATERIAL COMPOSITION:

- Mixture of fire-retardant materials with sweat wicking and breathable properties.

EffiSHELL:

- It is a mixture of 3 materials providing unique „tailor-made“ material composition developed by company Holik specifically for wildland fire gloves. It brings a combination of water resistance, reduced flammability and comfort, while maintaining maximum flexibility. Gloves with this material can be worn for long hours thanks to its perfect properties.

FORESTA

KEY FEATURES:

- Extremely comfortable and high dexterity gloves.
- Gloves are designed in a way that seams do not intrude and the glove can be worn all day.
- Water repellent, heat and flame resistant and highly breathable.
- A pull loop on the palm for easier donning of the glove, which at the same time serves for hanging the glove.
- The material is extremely flexible, it adapts perfectly to any hand.
- Thanks to the top FR layer, the material is suitable for firefighter's gloves.
The reverse side is made of cotton which ensures maximum comfort and does not irritate the skin and ensures that the gloves can be easily donned and doffed, even when wet.
- The glove dries quickly when turned inside out.

SIZE:

 (cm)	15,2–16,5	16,5–19	19–21,6	21,6–24,2	24,2–26,7	26,7–29,2	29,2–30,4	30,4–32,9
size	6 (XS)	7 (S)	8 (M)	9 (L)	10 (XL)	11 (2XL)	12 (3XL)	13 (4XL)

OTHER INFORMATIONS:

- Anatomical cut of the glove.
