

Holík Care&Maintenance

This project is focused on the care of our gloves. In this set of products, you can find washing gel, oil emulsion, and impregnation spray.

Holík Care&Maintenance

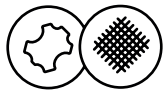

Washing gel

Natural-based washing gel for leather and textile gloves with high washing efficiency. It reduces the amount of bacteria, does not harm the environment and is fully biodegradable.

Emulsion

The protective emulsion nourishes and protects from water, oil and dirt, and revive the colour of the material. Add emulsion to leather to avoid the hardening of the leather when drying.

Impregnation spray

Highly effective impregnating spray for leather and textile adds water-repellent, oil-repellent, and anti-dirt properties of the face part of the product and leaves the product breathable.
